CREW Webcast to Feature Panel on Lean Processing

The March 15 CREW Webcast has scheduled a discussion on the benefits of lean processes and cycle time reduction in the collision repair industry.

Using a panel discussion format, a panel of experts including Michael Giarrizzo, President & CEO of DCR Systems Accident Repair Centers, James Berkey, Director, Lean Enterprise, PPG Industries, Inc., Rich Altieri, Senior Manager, Business Solutions, PPG Industries, Inc., Robert Briselli, Strategic Planning Consultant, DuPont, and Paul Krause, CEO, Craftsman Auto Body, will share the stage with the CREW Webcast producers and presenters, Matthew Ohrnstein and Vincent Romans.

The discussion will focus on emerging collision repair operating models designed to remove waste, reduce cycle times and improve customer satisfaction, while ensuring improvement in cost, quality, on-time, delivery performance, inventory turnover and return on invested capital.

CREW is hosted by Fix Auto and is designed to give industry professionals high-level, current information about the rapidly changing industry.

Each meeting includes a web-based visual presentation with a simultaneous audio conference call allowing participants to question the presenters. Matthew Ohrnstein, Symphony Advisors and Vincent Romans, The Romans Group, produce and present the monthly, one-hour Webcast meeting.

There is no cost to participate but prior registration is required. If you are interested in joining a future CREW Webcast please call the CREW help desk at (714) 279-2023 or via e-mail at crew@crewwebcast.com

The CREW Webcast is held every third Thursday bi-monthly at 11 a.m. PST.
